About

I'm a UI/UX designer specialized in creating interactive prototypes for web and mobile apps. By using a minimalist approach, I bring clarity and structure into a project so users can easily understand it's message and achieve the desired goal.

After I graduated from the Faculty of Letters I've started a master degree in book editing but gradually while studying for my master's and working in a publishing house on editing book covers I've discovered my passion for design.

In the last 3 years I've worked as a web designer as well as web developer, now I am trying to specialize in UI/UX.

I enjoy turning complex problems into simple, minimal and intuitive designs using a working cycle includes research, wireframing, prototyping, testing and interation.

My goal is to design products and experiences that are meaningful and I'm especially interested in utilizing new technologies to improve the way a message is transmitted and received.

Experience

From August 2016

User experience designer

nickbeuca.com

From January 2016 to July 2016

Web designer

ota.ro

From October 2015

Web designer & developer
